

# LUISA M. TANURE

+1 919-501-8057 | luisa.mtanure@gmail.com | Portfolio | GitHub | LinkedIn

## Education

### University of North Carolina at Chapel Hill

Expected May 2027

Bachelor of Science in Computer Science and Statistics & Analytics

Relevant Coursework: Data Structures and Analysis, Computer Organization, Systems Fundamentals, SWE Laboratory

## Technical Skills

**Languages & Web:** Java, Python, C, C++, SQL, Swift, JavaScript, TypeScript, HTML, CSS

**Frameworks & AI:** Spring Boot, FastAPI, React, React Native, Expo, SwiftUI, LLM Application Development

**Data & Infrastructure:** PostgreSQL, RabbitMQ, Kafka, AWS (Athena, S3), Kubernetes, Rancher

**Developer Tools & APIs:** Git, Jenkins, Postman, Google Calendar API, REST APIs

## Experience

### BTG Pactual

São Paulo, Brazil

*Returning Software Engineering Intern (Java)*

June 2026 – August 2026

- Returned to the engineering team with greater autonomy, independently owning backend changes from implementation through testing, deployment, and production monitoring.
- Delivered **10+ production enhancements** across Java and Spring Boot services, including new REST endpoints, API improvements, bug fixes, and standardized error handling.
- Improved reliability by refactoring and standardizing webhook processing across **30+ API integrations**.

*Software Engineering Intern (Java)*

June 2025 – August 2025

- Designed an OTP authentication REST API using Java and Spring Boot, implementing secure token verification workflows.
- Built a real-time account balance pipeline consuming RabbitMQ events and materializing balances in PostgreSQL, replacing a third-party tool and saving **\$5K per month**.

### One by One NGO

Rio de Janeiro, Brazil

*Volunteer Python Instructor*

2020 – 2023

- Taught Python and computer science fundamentals to **15+ students** from underserved communities through project-based lessons delivered three to four times weekly.

## Projects

### CalSync | Project Page | GitHub

Spring 2026

- Led backend development of an **AI-powered web application** that extracted deadlines and dated events from course syllabi and converted them into structured calendar events.
- Built Python and FastAPI workflows that generated .ics files or added events directly through the Google Calendar API.

### Commonplace | Project Page | GitHub

Aug 2026 – Present

- Built core flows for a **mobile reference library** in Expo/React Native and TypeScript, including entry creation, editing, and deletion; custom types and tags; and library search and filters.

### CSXL Agentic AI Refactor | Project Site

Spring 2026

- Refactor the CSXL web platform for **agentic AI workflows** and design acceptance tests and repository standards for reliable AI-assisted development.

## Leadership & Activities

### Pearl Hacks Hackathon

Chapel Hill, NC

*Executive Chair (President) & Experience Chair*

Apr 2026 – Present

- Lead a **30+ member board** and oversee organization-wide strategy and execution across Experience, Logistics, Sponsorship, and Marketing.
- Direct the participant experience for **400+ attendees** and manage three Experience directors responsible for workshops, mentorship, activities, communications, and participant support.

*Director of Event Support; Director of Hacker Experience*

Apr 2024 – Apr 2026

- Managed event logistics, supported a **\$70K budget**, coordinated 90+ volunteers and 10+ mentors, and delivered Hack 101 workshops for beginner participants.

### UNC Computer Science Experience Labs

Chapel Hill, NC

*Student Ambassador*

August 2025 – Present

- Support 100+ students during biweekly shifts and help maintain a welcoming, collaborative lab environment.
